

ARTYFY

Project Team - 5

COMP8117 Fall 2021

## **Meeting Minutes**

## **Sprint 1**

### **Week 1:**

Discussion on:

Planning the flow of screens and system

Xml

Basics of java

Writing activities with java

Intents

Sharing progresses of everyone's work

### **Week 2:**

Discussion on:

Database analysis

Using AWS or not

Using Firebase instead of AWS

What variables to use for user registration

Using mail or phone number for registration

Requirements analysis for algorithm

Sharing progresses of everyone's work

## **Sprint 2**

### **Week 3 & 4**

Discussion on:

Tables for art

Creating abstraction for art owner persona

Data for museums or art galleries

How to implement nearby feature

Location access of user

Getting Location failure in emulator

Placing of delete art button

Details to displayed for art

Progress and creating algorithm

Sharing progresses of everyone's work

### **Sprint 3**

#### **Week 5 & 6**

Discussion on:

Details to be included for detailed description of Art gallery

List view of different arts

Art detailed view

OTP time decreasing

List view improvement and design

Art owner registration screen flow change for better purpose

Positioning art finder feature

Manage art synchronizing admin and user art data

Sharing progresses of everyone's work

### **Sprint 4**

#### **Week 7 & 8**

Discussion on:

Artist persona

Replication of owner for artist

Whether to use nearby feature for artists

Artist detailed view

Arranging artists

Whether to integrate real time payment service or not

Accuracy and relativeness of algorithm

Overall system by everyone

Sharing progresses of everyone's work

## **Sprint 5**

### **Week 9:**

Discussion on:

Final testing

Release

final presentation

Overall system by everyone

Documents for final reports to be submitted

Filter option implementation

Algorithm integration with application

Decided parts to be presented
